

MaxAir – Holidays Function

MaxAir provides an 'Holidays' option, which allows the definition of a schedule which will override the 'normal' schedules between a start date/time and an end date/time.

Holidays mode is activated by clicking on the 'Holidays' button on the 'Home/One Touch' screen. While active the status indicator will change from blue to red.

Click on the + icon to create a new 'Holiday Period'.

A screenshot of the MaxAir 'Add Holidays' form. The top bar is orange with a paper plane icon and the text 'Add Holidays'. The top right shows '18:48'. Below the bar, there is a checkbox 'Enable Holidays' which is checked. Underneath is a section 'Departure' with a paper plane icon and a text field containing '2022-04-14 10:00'. Below that is a section 'Return' with a house icon and a text field containing '2022-04-14 11:00'. At the bottom left are two buttons: 'Cancel' and 'Submit'. At the bottom, it says 'Outside: 7° C' with a cloud icon and 'Clouds - broken clouds'.

Enable and set the Depart and Return Date/Time values, then click on the 'Submit' button.

Click on the Timer icon to create a schedule in the usual Manner.
