

MaxAir – Themes

The 'look' of MaxAir can be customized through the use of colour themes. There are currently seven selections available, Blue, Orange, Dark, Red, Violet, Amber and Teal. Each theme is also available with the tiles either left or centre justified.

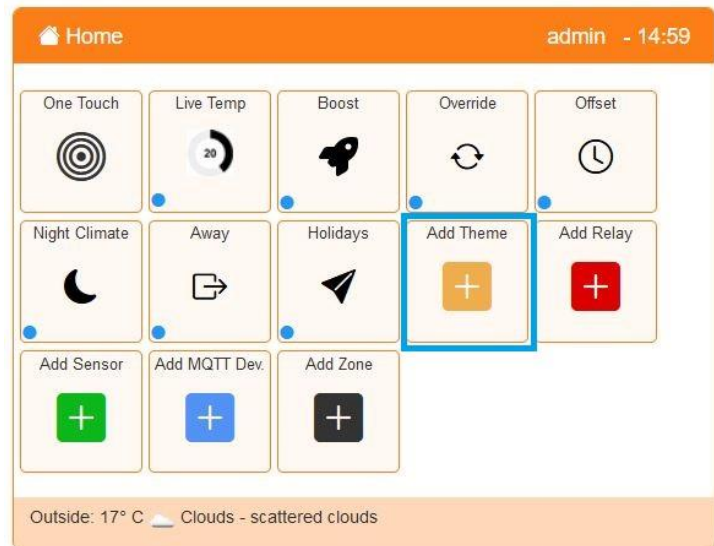

In addition, the 'look' can be further customized by changing the colour of the text and/or the size of the home screen tiles and/or the justification of the tiles on the screen. For example, a violet theme, with black text, centre justified and with wide tiles is shown:

Selecting Themes, Adding New Themes and Editing Existing Themes

New themes can be configured from the One Touch screen using the Add Theme option.

The screenshot shows the 'Add Theme' configuration screen. It has an orange header bar with a plus icon and the text 'Add Theme' on the left, and '15:00' on the right. Below the header are several input fields and dropdown menus. The first field is 'Theme Name' with the placeholder text 'Enter a Name for this theme' and the value 'Blue Right'. The second field is 'Justify' with the placeholder text 'Justify Buttons Left, Right or Center' and the value 'Right'. The third field is 'Theme Color' with the placeholder text 'Select Color for Heading Background' and the value 'Blue'. The fourth field is 'Text Color' with the placeholder text 'Select Color for Text' and the value 'White'. The fifth field is 'Select Standard or Wide Button Style' with the value 'Standard Button'. At the bottom of the form are two buttons: 'Submit' and 'Cancel'. Below the form is a status bar showing 'Outside: 17° C' and a cloud icon with the text 'Clouds - scattered clouds'.

Enter a descriptive name.

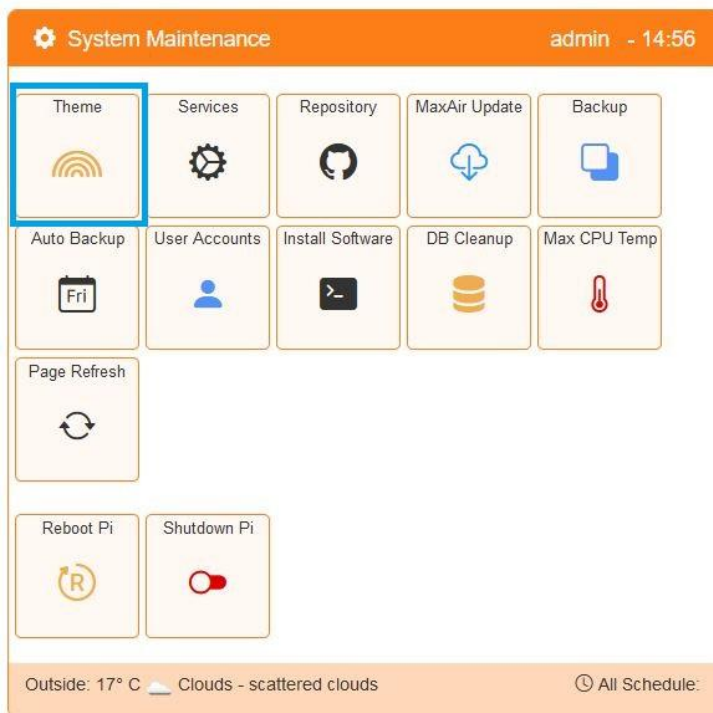

Select either left, centre or right.

Select the background colour.

Sect the text colour.

Select the home screen tile width.

Click Submit to save the new theme.

The Theme is select using the Settings/System Maintenance/Theme option.

Select the theme required from the list of available options
